Chain Cleaner & Degreaser Spray

Description

IT-1116 is a solvent based, high power chain cleaner spray for bicycles & motorcycles. Made with highly active solvent blend which provides maximum performance in a chain cleaning without disassembling the chain, a complete evaporation make this the an ideal chain & sprocket cleaner spray prior to applying new lubrication.

Advantages & Benefits:

- The aerosol packing avoids loss of solvents owing to evaporation
- The spray can be properly directed which results in an economical use.
- The aerosol jet action helps the cleaning process.
- Avoids direct contact with hands.
- The cleaning agents evaporate quickly.

Application Method:

Spray from a distance of 6-12 inches depending on the power of the spray jet needed.

Disclaimer: This product Data Sheet was last updated in July 2009. The information contained in the data sheet reflects the state of engineering know-how and the results of extensive tests and practical application studies. However, on the account of diversity of possible applications and technical conditions, this information can be regarded as indicative for suitable application and is not necessarily transferable to specific instances. Accordingly we recommend, in every case, that trials be conducted on specific applications before any general product use. No director indirect liabilities are accepted unless specified.
