

Dry Waxy Anti-Corrosion Coating Spray

Description

IT-1090 is a high Performance waxy coating designed for protection of the finely machined metal surfaces such as tools, dies, moulds, including plastic injection moulds, spare parts, machines etc. against corrosion during storage and transport. This coating also protects under tropical climate and marine conditions.

Features:

- The film is very thin, color-less and dry.
- Ideal of components where markings must remain visible
- It has a lubricating effect. Coated parts can be welded or assembled directly without any preparation.
- Can be applied over painted surfaces also. The product does not harm rubber and plastics

Typical Properties:

Description	Units	Specification
Color		Light green liquid
Base		Synthetic wax, solvents & additives for anti-corrosion
Density at 20°C	g/cc	0.70
Film Thickness	µm	25 – 40
Film Type		Dry waxy
Drying Time		10-30 min at room temp.
Surface Coverage	m ² /can	7
Corrosion Protection		1 year
Temperature range	°C	-40°C to +70°C
Metals protected		Multi-metal

Shelf Life:

When stored at or below 20°C in the original unopened containers, this product has a stable life of 12 months from the date of production.
